

The image features a background of several stacks of casino chips in various colors: gold, green, white, yellow, and red. Each chip has the Abbiati logo and contact information printed on it. The logo consists of the word 'ABBIATI' in a stylized, bold font with a red and white striped pattern. Below it, the text 'CASINO EQUIPMENT' and 'ITALIA' is visible, along with the website 'www.abbiati.com' and a phone number 'x39-011-9567865'. The word 'SECURITY' is also printed on some chips. The chips are arranged in a way that shows their edges and the texture of the material.

ABBIATI
CASINO EQUIPMENT

ITALIAN QUALITY & DESIGN

AMERICAN CHIPS

The Abbiati Company is privately owned by the Abbiati family and is based in Turin, Italy. Abbiati Casino Equipment has been in business in excess of 30 years and has had its professional articles for Casinos since 1976.

Abbiati has built up an international reputation and client base with almost every county and city that offers legalized gaming.

The company is on two sites within 50 metres from each other; one housing Office, Show Room and Production facilities and the other is used for assemblage and storage; with the option of expansion on both sites.

Abbiati Casino Equipment's main business is manufacturing and supplying Casino based equipment as used in live gaming: Roulette Wheels, Tables, Value Chips, Plaques and Jetons and all styles of gaming layouts (table felts) together with technical back up of full CAD design and technical services.

Our manufacturing facility is split into three main sections, all located under the same roof:

- Chips and Plaques are manufactured with the latest injection moulding machines, incorporating the latest RFID Technology using 13.56 MHz with PJM.
- Table and Roulette Wheel manufacture and assembly incorporate our CNC machining processes to ensure quality and precision, along with Layout (table felts) design and printing department for both wool and synthetic products.
- Electronic departments for the assemblage of Winning Number Displays, Laser Wheels and Independent electronic levelling systems for Roulette wheels.

All our manufacturing processes are supported by our Graphic and CAD Design department, to ensure Italian Quality and Design.

Quality, Service and Security are prime objectives for the Abbiati Company, which has secure rooms and high surveillance for the final assembly of the value chips incorporating RFID.

Our consistent growth and success stands as a witness of our continued commitment to deliver high quality, flawless products and services.

President
Giovanni Abbiati

RFID (radio frequency identification)

VALUE & NON VALUE CHIPS

Abbiati Casino Equipment purchased the license which enables them to use the Magellan Technology and is one of the only chip manufacturer able to offer the RFID solution; using 13.56 MHz PJM RFID enabled tags for their value and non value chips.

BENEFITS TO THE END USER

Security, Table Performance, Chip Movements, Player Information and real time information.

The **RFID** Chips speed and accuracy using the 13.56 MHz PJM technology allows us to help Casinos improve their performance in mission critical areas such as game speed, for an industry where time is money, being able to increase the speed of information is a huge benefit.

The 13.56 MHz PJM **RFID** Value chip can be read at an amazing 800 pieces per second with the information being recorded showing the number of chips of each value, the total value per denomination and the sum total.

RFID is a must have solution

ITALIAN QUALITY & DESIGN

RFID VALUE CHIP 13.56 MHz PJM & C.I.S (Chip Inventory System)

The Abbiati 13.56 MHz PJM RFID Value chip can be used in conjunction with the C.I.S (Chip Inventory System) which will give the operator total control over all chip movement through the Casino, with verification and authorization at each stage.

From acceptance into the Vault, Vault to Cage, Cage to Table/Chip Tray, and Table to Table back to Cage.

All movements are recorded in real time, allowing the operator to have total visibility and information of all chip movements and table performance, with the added advantage of security that the chips being played have been authorized.
